PROFESSIONAL SUMMARY

Fullstack Developer with 2+ years of experience delivering production-grade web applications for outsourcing and product environments. Specialized in React, Next.js, NestJS, and TypeScript, with a track record of owning features end-to-end — from API design to UI delivery. Consistently reduced feature delivery time by 30–40% by integrating AI-assisted workflows (GitHub Copilot, Cursor) into daily development cycles. Comfortable working in Agile teams, performing code reviews, and writing tested, maintainable code.

PROFESSIONAL EXPERIENCE

Fullstack Developer

BridgeUp Education – EdTech Startup | Jan 2025 – Present | HCMC

Leading full-stack development of BridgeUp, a comprehensive career development platform serving 500+ users with many integrated large modules.

- Architected scalable frontend with React + TypeScript + Vite + TailwindCSS; implemented code splitting and lazy loading, reducing initial load time by ~35%
- Integrate AI APIs (OpenAI and internal AI). Build a chatbot to support users.
- Optimized application performance with React Query for data fetching, reducing API calls and enhancing user experience
- Designed RESTful APIs with NestJS & Prisma ORM; optimized PostgreSQL queries, cutting average response time from ~600ms to under 200ms
- Built social networking features (posts, likes, comments, sharing) handling 1,000+ daily interactions with real-time updates via WebSocket
- Implemented secure JWT-based authentication & role-based authorization protecting user data across multiple modules
- Achieved 80% test coverage using Jest + React Testing Library across 3 core modules
- Collaborated in Agile environment with Product, Data, and Content teams using Jira, consistently delivering features within sprint deadlines
- Tech Stack: React, Vite, TailwindCSS, TypeScript, NestJS, Prisma ORM, PostgreSQL, JWT, Cloudinary, Vercel, Render

Fullstack Developer

DXT Technology Company | Jul 2023 – Dec 2024 | HCMC

Developed enterprise-grade web applications serving 2,000+ users with focus on performance optimization and scalability.

- Built responsive web applications with React, Next.js (SSR/SSG), and TypeScript, improved Lighthouse performance score from 62 to 89 through SSR and image optimization
- Integrated RESTful APIs and third-party payment gateways; processed 500+ monthly transactions with 99.9% uptime
- Managed complex client state with React Query & Context API, eliminating prop drilling and reducing unnecessary re-renders by ~40%
- Created comprehensive API documentation using Swagger, improving frontend-backend collaboration efficiency Tech Stack: React, Next.js, TailwindCSS, Node.js, TypeScript, Prisma ORM
